AN ACT
ACCELERATING PUBLIC SECTOR INVESTMENTS IN LOCAL
INFRASTRUCTURE, ESTABLISHING FOR THE PURPOSE THE LOCAL BUILD,
BUILD, BUILD PROGRAM, PROVIDING FUNDS THEREFOR, AND FOR OTHER
PURPOSES

EXPLANATORY NOTE

Local governments perform a critical role in the delivery of basic social services and implementation of government programs and projects in the country. Under the prevailing policy regime, local government units (LGUs) have significant mandates on matters concerning agriculture, health, social welfare, public works, solid waste management, environment, local enterprise management, public order and safety, human settlements, tourism and even in disaster risk reduction and management. As such, the success of government plans, programs and projects, especially in the remote areas of the country, depends considerably on the capacity of the LGUs and the availability of infrastructure to effectively implement the laws and execute government interventions.

Despite the mandates imposed on local governments, the infrastructure system at the local level remains inadequate, if not absent. This, in turn, impairs the ability of local governments to effectively implement programs and projects within their respective jurisdictions.

This bill seeks to remedy this situation by accelerating public infrastructure spending at the grassroots level. This bill seeks to establish a Local Build, Build, Build Program as a national strategy for providing intensive public infrastructure investment in all provinces, cities, municipalities and barangays of the country. Under this proposed measure, the additional share of LGUs from the national taxes collected by the Bureau of Customs in accordance with the Supreme Court decision in *Mandanas vs. Executive Secretary*, G.R. No. 199802 shall be earmarked for local infrastructure projects, particularly those that boost local employment and tourism, raise agricultural productivity, manage health-related causes of mortality and morbidity, maintain public order and safety, reduce the actual and opportunity cost of doing business, and improve the delivery of basic social services.

The bill further mandates the release of the share of each province, city municipality, and barangay from the Program to their respective treasurer without need of any further action on a quarterly basis, and shall not be subject to any lien or holdback that may be imposed by the national government. It also facilitates the convergence of local government interventions and the cooperation among LGUs to ensure the enhancement of operational efficiency, effective utilization of public resources, realization of project outcomes, and strengthening of mechanisms for inter-local cooperation.

This intervention is conceived in cognizance of the indispensable role of local governments in the delivery of social services, and their potential for greater contribution to socioeconomic development and ultimately, nation-building.

In view of the foregoing, the swift passage of the proposed measure is earnestly sought.
