S. NO. **2800**

EXPLANATORY NOTE

Article II Section 13 of the 1987 Constitution declares that the State recognizes the vital role of the youth in nation-building and shall promote and protect their physical, moral, spiritual, intellectual, and social well-being. Moreover, Section 15 of the same affirms that the State shall protect and promote the right to health of the people and instill health consciousness among them. Notwithstanding such policy assertions, government efforts remain inadequate, in light of the soaring statistics of children afflicted with and dying of cancer, to wit:

- *3,000 to 3,500 children are diagnosed with cancer often at an advanced stage every year. Late diagnosis is a major problem with parents and local doctors unaware of the early signs of childhood cancer;*¹
- *Around 80% of children fail to complete the full course of treatment. It can be assumed that those who abandon treatment eventually die since cancer is ultimately fatal if not treated.*²
- *Metro Manila cancer registry records in three hospitals show that eight kids/one very 3 hours, die everyday. Many more cases and deaths remain unreported;*³
- *In developed countries, childhood cancer survival rate is as high as ninety-five percent (95%). In the Philippines, sadly, it is only ten to thirty percent (10-30%). Of the ten who are diagnosed, only two or three will most likely survive. They die because they are poor, unable to afford the high costs of medication and treatment.*⁴

It is against this alarming and bleak backdrop that this bill seeks to establish a government hospital especially committed to the treatment and care of indigent Filipino children suffering from cancer. Further, this measure also provides that the hospital shall be the center for children's cancer research of the Government.

This bill is a counterpart of the proposed measure filed by Reps. Irwin C. Tieng and Mariano Michael M. Velarde, Jr. of BUHAY Party-List in the House of Representatives. It is hoped that the passage of this measure shall provide a national model for the treatment and care of children with cancer, and accordingly, significantly reduce cancer morbidity and mortality among children in the country.

In view of the foregoing, immediate passage of this measure is earnestly sought.
