

SEVENTEENTH CONGRESS OF THE REPUBLIC  
OF THE PHILIPPINES

First Regular Session

SENATE  
S.B. No. 1440

RECEIVED BY

Introduced by Senator Poe

AN ACT  
CREATING THE PHILIPPINE AIRPORTS AUTHORITY, DEFINING ITS  
POWERS, FUNCTIONS AND RESPONSIBILITIES, PROVIDING FUNDS  
THEREFOR, AND FOR OTHER PURPOSES

*Explanatory Note*

The Philippines has 85 airports nationwide, four (4) of which are regular international airports and five (5) are alternate international airports. These airports are classified under the new system of classification instituted by the Civil Aviation Authority of the Philippines (CAAP) into international airports, principal airports, and community airports. Only airports owned by the national government are classified by the CAAP; the vast majority of minor aerodromes around the country are not owned by the national government and remain unclassified under the new scheme. Under the scheme, all domestic airports in the country are under the operational and supervisory control of CAAP pursuant to Republic Act No. 9497, while the international airports are governed by specific authorities and/or corporation created by law for the purpose.

Among others, the Manila International Airport Authority (MIAA) was originally created pursuant to Executive Order No. 778, as amended, and exercises jurisdiction over the Ninoy Aquino International Airport. The Clark International Airport is operated and managed by the Clark International Airport Corporation created by virtue of Executive Order 193. On the other hand, the Mactan-Cebu

International Airport is under the operational and supervisory control of the Mactan-Cebu International Airport Authority in accordance with Republic Act No. 6958.

Currently, there is a need to upgrade existing international and domestic airports, and air navigation facilities in the country to comply with international standards of airport accommodation and services, and to meet the present and future air traffic and aviation services demands in the country. Studies have indicated that the objectives of providing high standards of accommodation and service within the context of a financially viable operation will best be achieved by a separate and autonomous regulatory body.

This bill seeks to ensure an integrated manner of operating international and domestic airport terminals in the country, and to avoid conflicting policies and programs on airport maintenance, operation and development, as well as flight operations, through the creation of a Philippine Airports Authority to handle the operations of all international and domestic airports in the country.

In view of the foregoing, the early passage of this bill is earnestly sought.
