**AN ACT RECOGNIZING ALTERNATIVE MODES OF PUBLIC
TRANSPORTATION, PROVIDING REGULATIONS GOVERNING
THEIR OPERATIONS, AND FOR OTHER PURPOSES**

EXPLANATORY NOTE

Technology has opened up a lot of opportunities to people. It has enabled people from all over the world to communicate with each other, and be updated of each other's lives as if no distance divides them.

Technology has also introduced massive changes in the transportation sector. One of this changes is the ridesharing model, which is a system that connects private drivers and vehicles with riders seeking rides at an agreed upon price, through the use of an online application or model.¹

In the Philippines, this ridesharing model has also been seen with the entry of ride-hailing companies such as Grab and Uber. A study of online sentiments conducted by the Research and Technology Lab found that 46.47% of online Filipinos in Metro Manila prefer Transportation Network Vehicle Service (TNVS) as their primary source of transportation.² According to a study presented by Grab, one of the leading TNVS companies, only 35,000 vehicles service an estimated 600,000 bookings everyday.³

Unfortunately, while the demand for TNVS remains high, the legal framework on their operation, as well as that of transportation network companies (TNCs) remains unclear.

This bill seeks to address this gap by clarifying the responsibilities of rideshare support companies, their liability, and the licenses required of them. Under this bill, a rideshare support company must obtain a permit from the Land Transportation Franchising and Regulatory Board in order to operate. In turn, the rideshare support company must accredit rideshare network drivers after determining their fitness to act as such. This bill also clarifies that the rideshare network vehicles do not need to obtain any other permit other than the vehicles' registration with the Land Transportation Office (LTO).

This bill also makes the rideshare support company liable for injuries or death to passengers aboard a rideshare network vehicle for the company's failure to exercise extraordinary diligence in the selection and supervision (as required under this bill) of rideshare network drivers. Rideshare support companies are also required to maintain an insurance to cover for passenger injuries arising from motor vehicle accidents during a pre-arranged ride in an amount of at least Two Hundred Thousand Pesos (Php200,000.00) per passenger.

The immediate passage of this bill is earnestly sought.
